beyond surfaces. beyond carpentry.

## INTARSIO GIAN & PIERO Design Harry Hersche

Side tables with wood intarsia in the table top edge. A craftsmanship with historical value combined with a simple, sustainable base made of solid wood. The combination of a thin, squared table top and the diagonally placed legs creates a capricious character, which is also supported by the diagonally arranged intarsia. Because of the two different sizes GIAN and PIERO can be used as nesting tables. The table base is made with solid wild service tree finished with clear matt varnish. The wood intarsia in the table top edge is a combination of wild service tree, maple and walnut also in a clear matt varnish finish. The table surface and the soffit are made with anthracite linoleum.

GIAN-L 40 cm, W 40 cm, H 45 cm / PIERO-L 35 cm, W 35 cm, H 50 cm
